# Advantages Of English Language As A Lingua Franca

Whether you call it the language prejudices or linguistic elitism, the belief that the ability to speak any language particularly makes one person completely superior to the other person is a danger to the society along with the fact that it is an inconsiderate of reality for the lesser pillaged people within the society. However, this is wildly accepted around the world which can be observed in all cultures due to colonialism and its impacts. The English Language has emerged as a global language through the 18th, 19th and even 20th centuries as most colonizes were governed in the name of England hence making the English Language the official language of the dominion state.

As a result, this English Language became the language of the ruling elite’s class who were prosperous and successful so any person who wanted to look wealthy and show the dominance of his or her social states choose English as a medium of communication. Therefore it became a symbol of higher social class. Alongside the fact that the English Language opened doors of opportunity for those who were socially and economically deprived in terms of jobs and work in general. This embedded the idea of social dominance of the English Language in young, developing minds of newly independent nation’s which still exists till date.

The elitism of the English Language further got emphasis by the welfare and development of the western countries. The best example of this could be of United States of America became a superpower due to its flourishing economy and better rather luxurious living conditions by means of which the United States of America became the land of opportunity again its national language was the English Language which had to be learned by those who wanted to make their lives better and live the American dream. This further strengthened the connection between social-economic achievements and English Language.

Due to colonialism, English Language started to be used by most countries around the globe and hence become a form of communication for the emerging economies around the world this lead by common goals of business growth further developed the English Language in many different styles adding the versatility of to the vocabulary of words and adding more depth to the English Language itself. This made English an International acclaimed language and introduced a new concept in people's minds that those deprived of the English Language may be subsided.

## Advantages of English Language:

International Relations are developed by mainly English Language due to the fact that it is the primary language of business groups throughout the globe. Most international business, memos, including emails, transactions, contracts and reports, happen to be written in the English Language. Frequently translating offers, forms, purchase orders and correspondence is time-consuming as well as potentially fraught with errors.

Employment Opportunities are also the advantages of the English Language as the ability to speak fluent English in addition to your own native (tongue) language can be beneficial if you're seeking job opportunities with internationally acclaimed companies. Many employers prefer or rather require English-speaking individuals with writing proficiency in English as well. Job

interviews for international companies and their business positions are mostly conducted in the English Language. Hence the ability to speak this more universally known business language can take you as well as place you a step ahead of your competitors.

Education Opportunities for students from many other countries who have also attended school in English-speaking countries such as USA or UK will benefit greatly if they know basic English. This knowledge will help them communicate with their hosts along with as students and teachers at their own school system. These international students will also easily understand their studies, including reading texts and doing research work on topics for classes. A great amount of research in scholarly journals is written with English as the main language. So knowing English Language can be helpful for scholars who wish to communicate their own ideas as well as research work and findings to peers in their respective fields

Entertainment and Media the major Hollywood movies and many televisions shows popular around the word have dialogue are in the English Language. The plot is easier to follow if the person watching the movies is a speaker of English himself. Subtitles in other languages can sometimes cause the meanings to be distorted the words to be lost in the translation itself, and can also be a distraction for the person or even block actions that are taking place on the screen of the Television. Translating and printing materials like books, newspapers and magazines is also considered time-consuming thus English is used.

Travel and Tourism is also done mainly in the English language which had become predominantly spoken throughout the world, so international travellers may as well find out that speaking English can make their travels way easier. As most hotels and restaurant employees, alongside store merchants, also probably speak English to some degree as then. Their for being able to converse with people living in such area where you are spending holidays or vacationing adds to its richness and a better cultural experience.

Computers and Technology in the English Language is the most software programs are written in English. Those who are seeking to expand their technical and computer knowledge can find the ability to read and to understand the English language to be invaluable. Members of research teams are needed to share language for the exchange of ideas. So English proficiency enables technicians along with engineers to quickly adapt to the new software tools of their company or the industry.

Therefore this gives us evidence that an individual in the society would definitely have a better chance at growth and prosperity in this day and age with the help of the English Language as the means of his communication and understanding which develops the concept of elitism in the minds of society.
