The Way Twitter Has Changed The World Of News And Media

Introduction

“Twitter, initially known as twttr, is an American online news and social networking service which was started in March 2006 by Jack Dorsey, Noah Glass, Biz Stone and Evan Williams. It has it’s headquarter in San Francisco, California United States “(Wikipedia, 2019). It is a platform where a user can post and interact with other people through the means of messages or known as “tweets”. The Twitter app was developed for IOS, android and windows. People can download the app and start using it by simply creating the account. “Twitter's origins lie in a 'daylong brainstorming session' held by board members of the podcasting company ODEO” (Wikipedia, 2018). It allows users to communicate through the medium of texts, pictures and videos. “Every second on average, around 5000 tweets are tweeted on Twitter, which corresponds to over 350,000 tweets sent per minute, 500 million tweets per day and around 200 billion tweets per year”(Internet live status, 2018). In this report, we will talk about the Twitter impact on news industry and the effect the application had on the advanced network and the world. To do this we will take a gander at the advancement of Twitter, why it was an earth-shattering application, the computerized angles to it and what employments the application made.

Background

Before the Twitter there were some channels for communications. People used different form of letter pad for sharing instant news. The idea of sharing opinions are also different in the past. People used to gather and share their thoughts and ideas. “The official telling of Twitter's founding goes like this: Ex-Googler Evan Williams had a startup called ODEO. When Apple launched iTunes podcasting, and made ODEO's podcasting platform irrelevant, Evan and Biz and an ODEO employee named Jack Dorsey decided to create something called Twitter instead”(Bussinessinsider,2019).”The idea of students of talking and chatting in group result in the development of this platform” (Wikipedia, 2019). The idea of sending short messages in America has contributed to the development of the Twitter platform. A short bunch of consequential information and chirps from birds has led to the name formation “Twitter”. It works on principle of open source application frameworks. The journey from distributing dispatch software to the big startup of Twitter was great. The founder and CEO of Twitter Jack Dorsey who was college dropout had made a plan to make this platform and he is successful as well.

Description

The real-time data updates and the good design, user-friendly app experience of Twitter has helped to gain numerous users day by day. Plan components. Every user can share their real time news updates and be connected to the real world through virtual platform.

“Twitter is a popular tool for many journalists, giving them more power over what they publish

and who reads it, though at the same time making their jobs more 24/7”(NEWS.ILLINOIS.EDU,2018). Twitter is assuming a major job in the news nowadays.
